

AGENDA

29th of May 2019

**BIOSECURITY COMMITTEE
MEETING**

NOTICE OF MEETING

Please be advised that meeting of the

Biosecurity Committee

Commencing at **2.00pm**

Will be held on

Wednesday, 29th of May 2019

At Mount Augustus Tourist Park

John McCleary
Chief Executive Officer

DISCLAIMER

The advice and information contained herein is given by and to the Council without liability or responsibility for its accuracy. Before placing any reliance on this advice or information, a written inquiry should be made to the Council giving entire reasons for seeking the advice or information and how it is proposed to be used.

Please note this agenda contains recommendations, which have not yet been adopted by Council.

BIOSECURITY COMMITTEE

SHIRE OF UPPER GASCOYNE
DISCLOSURE OF FINANCIAL INTEREST AND INTERESTS AFFECTING IMPARTIALITY

To: Chief Executive Officer

As required by section 5.65(1)(a) or 5.70 of the Local Government Act 1995 and Council's Code of Conduct, I hereby declare my interest in the following matter/s included on the Agenda paper for the Council meeting to be held on (Date)

*Extent of Interest

Item No.	Subject	Details of Interest	Type of Interest Impartial/Financial

(See below)

* Extent of Interest only has to be declared if the Councillor also requests to remain present at a meeting, preside, or participate in discussions of the decision making process (see item 6 below). Employees must disclose extent of interest if the Council or Committee requires them to.

Name (Please Print) Signature Date

NB

This notice must be given to the Chief Executive Officer prior to the meeting or at the meeting immediately before the matter in which you have declared an interest is discussed, Section 5.65(1) (a) & (b).

It remains Councillors'/Employees' responsibility to make further declarations to the Council if a matter arises during the course of a meeting and no previous declarations have been made.

It is a Councillor's/Employee's responsibility to ensure the interest is brought to the attention of the Council/Committee when the Agenda item arises and to ensure that it is recorded in the minutes.

It remains the Councillor's responsibility to ensure that he/she does not vote on a matter in which a declaration has been made. The responsibility also includes the recording of particulars in the minutes to ensure they are correct when such minutes are confirmed.

It is recommended that when previewing Agenda, Councillors mark Agendas with items on which an interest is to be declared and complete the declaration form at the same time.

Councillors may be allowed to remain at meetings at which they have declared an interest and may also be allowed to preside (if applicable) and participate in discussions and the decision making process upon the declared matter subject to strict compliance with the enabling provisions of the Act and appropriately recorded resolutions of the Council. Where Councillors request consideration of such Council approval the affected Councillor must vacate the Council Chambers in the first instance whilst the Council discusses and decides upon the Councillor's application.

Remember: The responsibility to declare an interest rests with individual Councillors / Employees. If in any doubt seek legal opinion or, to be absolutely sure, make a declaration.

Office Use Only: Date/Initials

Particulars of declaration given to meeting _____

Particulars recorded in the minutes: _____

Signed by Chief Executive Officer _____

1. OFFICIAL OPENING

The Shire President opened the Biosecurity Committee Meeting at __:__ and welcomed those present.

RECORD OF ATTENDANCE

PRESENT:

Councilor Don Hammarquist, OAM, JP	Shire President
Councilor Jim Caunt	Deputy Shire President
Councilor Alys McKeough	
Councilor Ross J Collins	
Councilor Greg Watters	
Councilor Hamish McTaggart	
Councilor Blanche Walker

APPENDIX 2

(CRBA Executive Meeting – 8 March 2019)

Appendix 2.

Wooramel Meeting Report

I joined in on Executive CRBA meeting on Friday 8th March 2019, Attendees;

a.	Justin Steadman	-	Chairperson	-	Wooramel Station
b.	Tim Higham	-	Vice Chairperson	-	Meedo Station
c.	Aggie Forrester	-	Treasurer / Secretary	-	Winning Station
d.	Krystie Bremer	-	Executive Officer		
e.	David Blood	-	CEO		
f.	Jimmy Miller	-	Biosecurity Officer	-	DPIRD
g.	Dave Higgs	-	Coordinator	-	SUG

Discussed the following;

- 1) CRBA engaged LPMT working in the SUG on Towrana, Winderie and now Carey Downs. The CRBA was again informed that the SUG engaged LMPT should be servicing such as they are Stations with in the SUG
- 2) Showed the CRBA on a large map of the SUG where our priority areas are with wild dog numbers and explained that the SUG are servicing still Towrana, Winderie and Carey Downs as well as the rest of our Shire but they do not need as much attention for their size / dog sittings /attacks / dog numbers as some of our other Stations
- 3) Showed and explained some of our issues with dog Numbers pouring out of un accessible land such as Ex Wanna, Mt Augustus – Burringurrah- Waldburg Range Reserve Area and asked the CRBA R4R funded LPMT to service these areas instead of the 3 above stations
- 4) Jimmy Miller confirmed that any of the LPMT are able to access Ex Wanna area and at the moment an East section from Waldburg Range, The rest of the reserve is under a change of owner ship so access is to be confirmed
- 5) CRBA have now again changed their reasoning again for the R4R funded LPMT accessing the 3 Stations saying the R4R funding covers for small stock country so there is no available funding to service ex Wanna and east section from Waldburg Range
- 6) I asked the CRBA for a copy of the R4R funding agreement
- 7) I asked the CRBA for LPMT details – Licences / Permits / Insurances and LPMT Monthly activity Reports for the 3 Stations as they are working with in the SUG
- 8) Provided CRBA with revised copies of MoU from SUG
- 9) Suggested to the CRBA to alter MoU stating that if CRBA and SUG cross borders that it is to be approved by writing first
- 10) I also asked that the SUG be involved in any available Grants / Funding for additional assistance in such harsh and legally un accessible land with large un controllable dog numbers and issues
- 11) The CRBA suggested that if it was just a financial issue if they take over servicing the 3 above stations that it would only affect the SUG buy approx \$8-10k per year, I replied and said that that amount of money would impact on our exiting programme and that the stations are within the SUG so it is our responsibility

In Summary

There was many other basic items and issues discussed, some resolved and some that are still ongoing, The CRBA give me a bit of information to take away and research and they are pleased that there is a good professional relationship developing between SUG and CRBA

Dave Higgs

19/03/2019

APPENDIX 3

(Quarterly General Biosecurity Report – 6 March 2019)

Appendix 3.

BIOSECURITY REPORT

06/03/2019

RE: General Quarterly Report

1. Current Authorised Persons;
 - a. Dogging Coordinators remaining as Don Hammarquist and Hamish McTaggart
 - b. Mesquite Coordinator remaining as Ross Collins
 - c. SUG (Shire of Upper Gascoyne) LPMT (Licenced Pest Management Technician) remaining as;
 - i. Sid (SUG Reference Dogger No.1) Licence No.8065
 - ii. Bim (SUG Reference Dogger No.2) Licence No.6864
 - d. Biosecurity Coordinator for SUG remaining as Dave Higgs
2. Aerial Baiting Programme finalisation;
 - a. All the Drums of remaining AV Gas Drums have been Picked up / Returned to the Shire Yard and put into storage for future use
 - b. There was a substantial amount of baits left on the Minnie Creek Station and Dairy Creek Station Drying Racks, These baits have now been used up by our LPMT Sid for target baiting
3. RCP (Restricted Chemical Product) Permit Situation for stations with in the SUG;
 - a. 17 stations have current Permits
 - b. Waiting for 2 from DPIRD (Department of Primary Industries and Regional Development)
 - c. Currently Chasing up permit applications from 2 Stations
 - d. 1 Station being Mt Clere is serviced by Meekatharra RBA (Regional Biosecurity Association)
 - e. 1 Station refusing access on their station for and poisons being used for traps and target baiting, being Pingandy Station
 - f. Totalling of 23 Stations with in the SUG
4. Recording and Reporting;
 - a. SUG LPMT complete monthly activity reports
 - b. These Monthly LPMT Reports are uploaded to the SUG System being F Drive Schedule 5.9
 - c. The Monthly Reports are also submitted to the CRBA (Carnarvon Rangelands Biosecurity Association Inc.)
 - d. Daily Spot Device activations are continuously being used to ensure the safety and wellbeing of our LPMT's
 - e. New Feral Scan Devices are to be released to all the LPMT from the CRBA approx 28th March 2019, With more protection and safety accessories then previous models
5. Upcoming Meetings;
 - a. CRBA Executive Meeting Booked in for 10:30am Friday 8th March 2019 at Wooramel Station, I will be attending on behalf of SUG
 - b. CRBA Committee Meeting Booked if for 6:30pm Friday 8th March 2019 via Telephone Hook up
 - c. SUG holding a meeting with DPIRD and LPMT on the 15th March 2019 regarding Pig Programme
6. Upcoming Courses;

- a. CRBA are holding a LPMT Training day 28th March 2019 in Carnarvon (Details to be confirmed), Training to include new device and possible first aid refresher training
7. Current Activities;
- a. SUG LPMT Sid and Bim are continuously servicing the shire, They are tracking along to use up their allowed 200 days each
 - b. Sid and Bim are mainly using the target baiting method along with shooting method where required
 - c. Sid and Bim are mainly targeting the wild Dog / Dingo issues but have also worked on other wild pest such as Cats / Pigs / Donkeys etc on their travels
 - d. According to reports their appears to be less Wild Dog and Dingo numbers and activity with less Attacks on cattle and other animals
 - e. DPIRD Are Starting a 100 day Pig Control Programme on the Gascoyne River from Yinnetharra to Mt Clere on the 15th March 2019
 - f. Sid and Bim are offering Pastoralists additional training “Laying of 1080 Dried Meat Baits” and Preparation and Setting of Steel Jaw Traps for Canine Predator Control”. This Training comes from additional access to funding from the CRBA, It does not have any effects to the allocated 200 days to each Bim and Sid for actual biosecurity control
8. Current Issues / Items being worked on;
- a. Areas serviced by CRBA engaged R4R (Royalties for Regions) Funded LPMT. The SUG are trying to get the R4R LPMT to service lands managed by the government with in the SUG not just the Carnarvon Side to help the SUG service un assessable areas by SUG LPMT with higher wild dog activity and numbers then other areas
 - b. What actual areas the R4R LPMT can access
 - c. Remaining couple RCP Permits
 - d. RCP Permit and Access on to Pingandy
 - e. Any other available funding or assistance from the CRBA that the SUG is not getting as the SUG runs under the CRBA zone
 - f. Newsletter to send out to our Pastoralists

Dave Higgs

06/03/2019

APPENDIX 4

(New Property Activity Report)

APPENDIX 5

(LPMT Monthly Report)

Appendix 5.

LPMT Monthly Report

LMPT: Shire of Upper Gascoyne

MONTH: _____

Key Performance Indicators (KPI)

Dates:	Total Days Worked:		
Number of baits laid:			
Number of baits made: (excludes community baiting days)			
Community baiting:	Date:	Kgs:	
Number of traps set:			
Number of traps in the ground at the end of the month:			
Poison usage: (excludes community baiting days)	Strychnine: (0.5 grams/Trap)	1080 Oats: (# of oats)	1080 Liquid: (0.02 mls/Bait)
Number of Dogs destroyed:	Shot:	Trapped:	Other:
Stock damaged by Wild Dogs:			
Other Wild Life damaged by Wild Dogs:			
Number of reported wild dog complaints by landowners:			

COMMENTS:

APPENDIX 6

(Quarterly Biosecurity Newsletter)

THE FERAL FOCUS

Quarterly Biosecurity Newsletter

1st Edition April 2019

General News

- The CRBA and SUG are actively working together to achieve successful results regarding the Biosecurity Program of controlling the numbers of wild / feral small and large herbivores
- Our Local LPMT's Bim and Sid have primarily been target baiting and Setting out Traps for Feral Dogs on the majority of Stations with in the SUG, Our LPMT are endeavouring to visit all Station Homesteads during their travels and appreciate any relevant feedback on feral animal activity Including – Sightings, Tracks, Stock Damages
- CRBA have supplied New replacement Feral Scan Devices for our Local LPMT's to record the amount and what type of activities are current in which areas, *(SUG are currently in the process of uploading all relevant information and Maps, These devices should be in use in the very near future)*
- SUG are awaiting on the arrival of 1 tonne of new sausage baits supplied by CRBA to try out *(the feedback to date regarding the use and effectiveness of these new baits has mainly been positive)*
- The CRBA are currently organising a community engagement trip to all Shire under their area including the Shire of Upper Gascoyne for 6th or 7th of May 2019 (Dates, Times and Venue are yet to be confirmed).

Reporting

CRBA have recently supplied SUG with a new Monthly LMPT Activity Report template for our LPMT's.

The new Report will supersede to old basic Report and achieve more specific statistics for each individual Station for a clearer understanding and create a more accurate Data base of Biosecurity issues including the number small and large feral herbivores – Quantities, tracks, Stock Damage, Feral animals destroyed, days worked around what areas, potential problem areas, amount of Traps and Baits being used.

FERALSCAN
ORG.AU

Help map feral animal sightings in your local area
Launched in 2009 - Now hosting over 130,000 community records.

Training Modules

1. Laying of 1080 Dried Meat Baits
2. Preparation of 1080 (6mg) – Impregnated Oat Meat Bait
3. Preparation and Setting of Steel Jaw Traps for Canine Predator Control

Arial Baiting

Persons Involved in the Organisation and Running the Aerial Baiting Programme for the Shire of Upper Gascoyne where CEO - John McCleary, Works Supervisor / LEMC & Biosecurity Coordinator - Dave Higgs, Dogging Coordinators - Don Hammarquist and Hamish McTaggart

One of our local SUG licenced contractors Ken Kempton supplied 6 Tonne of processed Baits to the Shires Chiller ready for aerial baiting with in time and within budget

6 x Drums of AV Gas was supplied from Fads (Refuel Australia)

Contracted Pilot and Plan was Rollo, Eric Roulston from Norwest Air Work Pty Ltd had just finished the Pilbara and Meekatharra Runs then was engaged by the SUG for their services and was worked around the Murchison and Byro runs

Full 6 Tonne of baits taken to Dairy Creek Drying rack in 2 stages

Ken was also involved in the Transportation and Bait Injection Process.

Coordinated Quantities and Locations for 6 x Drums of AV Gas and 6 Tonne of Baits from Dairy Creek Racks Deliver as Following:

- | | | | | | |
|----|-----------|-----------|-------------|--------------|------------------|
| a. | 3 x Drums | 3 x Tonne | of baits to | Dairy Creek | Rack / Air Strip |
| b. | 1 x Drum | 1 x Tonne | of baits to | Yinnetharra | Air Strip |
| c. | 1 x Drum | 600 kg | of Baits to | Mt Augustus | Storage |
| d. | 1 x Drum | 1400 kg | of Baits to | Minnie Creek | Rack / Air Strip |

These Quants where both for Aerial baiting and Station to use that where not aerial baited.

Flight Plan

Summary

Baits / Fuel where ready and delivered at stations on time, The aerial baiting was successfully completed with no issues as expected, Unfortunately due to the busy time of the year with mustering etc. some stations missed out on the programme this run, but this has been addressed and hopefully more stations with in the Shire of Upper Gascoyne will become involved in the programme next time to potentially cover a larger percentage of the Shire of Upper Gascoyne's large harsh and inaccessible areas.

Baiting

Placement of Baits and Exclusion Zones

To help manage the potential risk of poisoning non-target species. Including humans, domestic pets, live stock and native animals there are distance restrictions for the placement of 1080 baits.

Under the code, the following minimum restrictions are specified:

For ground baiting programs, 1080 baits must be placed no closer than:

- 150 metres from a dwelling.
- 20 metres from a permanent or flowing water bodies.
- 5 meters from a boundary fences and
- 5 metres from the edge of formed/gazetted public roadways.
- or as directed by the Authoring Officer.

For aerial baiting programs, 1080 baits must be dropped no closer than:

- 150 metres from a dwelling.
- 20 metres from permanent or flowing water bodies.
- 500 metres from all property boundaries and constructed recreation sites, and
- 250 metres from the edge of formed/gazetted roadways,
- or as directed by the Authorising Officer.

Signage

Approved user **must** erect prominent warning signs at entrances and strategic points on the property to be baited alerting the public that 1080 baiting and Strychnine traps are taking place.

Please Double check your Signs to ensure they are still in-place and readable

The SUG have a limited number of signs available for free and a limited amount of Templates available for Loan only.

DANGER - Wild Dog Trap Signs

200mm x 200mm

DANGER – 1080 and Strychnine Signs

300mm x 300mm

DANGER – 1080 and Strychnine Template

400mm x 400mm

Western Australia Large Feral Herbivore Management

Development of State Strategy for LFH

LHF and Feral Pig Stake holders from many parts of Western Australia have held numerous consultation Workshops

Following the workshops, draft goals and supporting strategies will be developed to address the vision articulated by DPIRD for the future state of feral pig and LFH management, that being:

- Feral Pig / Large Feral Herbivore management is an integral part of the sustainable management of natural resources for the benefit of the economy, the environment, human health and public amenity.

Some Common important issues raised at the Workshop as below;

- uniform standards and practices across state government agencies
- better access to land, particularly Unallocated Crown Land – Substantial issue for CRBA with in the SUG
- the ability to mobilise more quickly
- greater freedom to undertake opportunistic culling
- the ability to pool and carryover funding
- Feral pig and LFH management is seen to be significantly under resourced, with no secure funding stream other than through rates raised by RBGs. All stakeholders (with the possible exception of state govt. agencies) are heavily reliant on federal and state grants for feral pig and LFH management activities. This funding is spasmodic, target driven and limited in nature and does not generally cover administration costs, despite administration being an essential activity.
- Raising the public's awareness of feral pig and LFH damage is seen to be important in order to maintain the social license to control these species and to stimulate the injection of public monies for control. However, stakeholders recognise that the public image of feral pig and LFH management needs to be carefully managed to avoid negative media attention.

Survey Reports

- **Feral Pigs**

The survey has confirmed that feral pigs are considered to be an issue of concern across the state, but are of highest concern in the South West region. The perceived economic value of the impact of feral pigs is similar when comparing the result from all regions combined (i.e. the whole state) to that of the South West region only. In both cases, the majority of respondents believe the economic impact to be medium or high, with nearly 10% of respondents in the South West region believing it to be severe.

Lack of funds and resources, lack of coordination and collaboration, accessing the land where the feral pigs are located, illegal hunting and deliberate translocation of pigs are seen as being amongst the most significant barriers to effective feral pig management both across the state and when the South West region is considered alone.

Not surprisingly then, timely and ongoing control, improved coordination and collaboration amongst stakeholders, and the effective management of illegal hunting and deliberate translocation of pigs are most frequently seen as the most important mechanisms to improve feral pig management.

- **Feral Camels**

38% of respondents consider feral camels to be an issue of concern in their area. This reflects the fact that feral camels are concentrated in the arid, desert regions of the state which fewer of the stakeholders who responded to this survey represent. However, the majority (45%) of those that do consider feral camels to be an issue of concern, rate their level of concern as high. The perceived economic value of the impact of feral camels is believed by the majority of respondents to be medium (38%) to high (41%). Lack of funds and resources, remote or inaccessible terrain, the sheer scale of the problem and land tenure issues affecting access to land where the feral camels are located are seen as being amongst the most significant barriers to effective feral camel management.

Timely and ongoing control, increased aerial culling, improved coordination and collaboration amongst stakeholders, strategic fencing (particularly of water sources in the desert) and improved knowledge of camel populations and movement patterns are seen as being amongst the most important mechanisms to improve feral camel management.

Commercialisation is seen by some as a solution to feral camel management and feral camels are currently an important source of income and employment for one Indigenous organisation based in the Gibson Desert. However the commercial market for camel is not economic for most. This creates a conflict between those who see feral camels as a either a current or potential future resource and those who seek to have them managed as a declared pest animal as legislation dictates.

- **Feral Horses**

34% of respondents consider feral horses to be an issue of concern in their area. This reflects the distribution of feral horses being predominately in the pastoral areas of the Kimberley, Pilbara, and Goldfields, with localised populations in Meekatharra and Carnarvon. The Kimberley, Pilbara, and Goldfields-Nullarbor regions were well represented by respondents to the survey, however the Meekatharra and Carnarvon regions were poorly represented. The majority (59%) of those that consider feral horses to be an issue of concern, rate their level of concern as medium. The perceived economic value of the impact of feral horses is believed by the majority of respondents to be low (37%) to medium (44%).

The objection of the general public and Indigenous Traditional Owners to horses being culled, coupled with animal welfare concerns, remote or inaccessible terrain and the sheer scale of the problem are seen as being amongst the most significant barriers to effective feral horse management.

ore trapping, timely and ongoing control, more ground level culling and the use of strategic fencing are seen as being amongst the most important mechanisms to improve feral horse management.

Enabling non-government shooters to use semi-automatic firearms from privately operated helicopters (described as “enable non-govt aerial culling” in the results section) is also seen as an important mechanisms to improve feral horse management. This would require amending firearms legislation.

- **Feral Donkeys**

30% of respondents consider feral donkeys to be an issue of concern in their area. This reflects the distribution of feral donkeys being predominately in the pastoral areas of the Kimberley, Pilbara, and Goldfields, with localised populations in Meekatharra and Carnarvon. .

Kimberley, Pilbara, and Goldfields-Nullarbor regions were well represented by respondents to the survey, however the Meekatharra and Carnarvon regions were poorly represented.

In contrast to the other three species, the majority (46%) of respondents that consider feral donkeys to be an issue of concern, rate their level of concern as low, however a significant number consider their impact to medium (21%) or high (29%). Exhibiting a similar distribution, the perceived economic value of the impact of feral donkeys is believed by the majority (50%) of respondents to be low, however a significant number consider the value to be medium (17%) or high (33%).

Lack of funds and resources, remote or inaccessible terrain, the sheer scale of the problem, tenure issues affecting access to land where the feral donkeys are located are seen as being amongst the most significant barriers to effective feral donkey management. More aerial culling, timely and ongoing control, the continuation and expansion of the Judas Donkey Program, more ground level culling and improved collaboration and coordination amongst all stakeholders are seen as being amongst the most important mechanisms to improve feral donkey management.

2019-2024 LFH Management Strategy Draft for WA

Scope

This Strategy outlines a high-level approach to the management of LFH across five regions; Kimberley, Pilbara, Carnarvon, Meekatharra, and Goldfields - Nullarbor of Western Australia from 2019 – 2024 and identifies strategic priorities to deliver economic, environmental and social benefits through improved LFH management.

The Strategy recognizes that effective LFH management requires a long-term, well resourced, coordinated approach across tenure boundaries and the active involvement of all key stakeholders including State Government agencies, local Governments, pastoralists, traditional owners, non-Government organizations, mining companies and research institutions. The ongoing support of the general public is also essential to ensure public funding continues to be applied to LFH management.

The Strategy recognizes that in some instances, particularly for Aboriginal traditional owners, LFH may have cultural significance or commercial value and these must be balanced with the obligation to manage these declared species.

The Strategy has been informed by the recommendations of experts and an extensive stakeholder consultation process. This has identified where LFH management is working effectively and where, with increased collaboration, cooperation and resourcing, improvements in LFH management may be gained.

The Strategy provides guidance for the wide range of stakeholders actively involved in LFH management in the rangelands of WA and identifies a range of key management opportunities and challenges. Some of the identified opportunities can be achieved simply through increased cooperation and collaboration and can be readily implemented at little or no cost. Others will require significant additional research, planning, time or funding to implement.

- **WA Biosecurity Strategy**

The WA Biosecurity Strategy 2016 – 2025, sets the strategic direction for partnership arrangements to manage biosecurity issues affecting agriculture, fisheries, forestry and biodiversity in terrestrial and aquatic environments. The strategy covers pest animals and plants, and diseases. It acknowledges that an effective biosecurity system needs to manage risks across the entire biosecurity continuum, and emphasises the importance of preventing incursions as well as detecting them early.

- **Invasive Species Plan for WA**

The Invasive Species Plan for Western Australia 2015 – 2019, identifies actions for a coordinated approach to manage existing and potential invasive species. The plan defines invasive species as vertebrate animals and plants that can cause undesirable impacts on economic, environmental and social assets and values.

The plan provides for greater involvement in pest surveillance by all stakeholders, and the use of improved ways of identifying and reporting pests. Developing a post-border surveillance strategy relevant to industry, community and Government will help achieve this coordinated approach.

- **Large Feral Herbivore Management is Strategic**

Management of LFH should be strategic in terms of determining where management should occur, timing of management, being proactive and using appropriate techniques. Prevention and early intervention are the most cost-effective techniques. Management should aim to address actual rather than perceived problems, and to reduce impacts rather than simply animal numbers. As part of an integrated LFH management program, commercial harvesting may offset management costs.

Stakeholder	Role in LFH management
Federal Government	
Department of Agriculture and Water Resources	Administer the <i>Biosecurity Act 2015</i> . Undertake biosecurity risk analysis, import approvals, diagnostics, standards, policy, education and awareness.
Department of Environment and Energy	Administer the <i>Environment Protection and Biodiversity Conservation Act 1999</i> .
State and Local Government	
Minister for Agriculture and Food	Under the BAM Act, may declare an organism as a declared pest for the whole or part of WA. Allocates funds for invasive species management and surveillance, as authorised by the BAM Act.
Minister for the Environment	If proclaimed, under the BC Act, may proclaim a species as an environmental pest for the whole or part of WA. Allocates funds for environmental conservation.
Department of Biodiversity, Conservation and Attractions (DBCA)	Undertakes surveillance and management of priority invasive species that affect environmental values on the state land that it manages. Administers the BC Act. Participates in cross-tenure control of invasive species with community groups. Implements Good Neighbour policy
Department of Primary Industries and Regional Development (DPIRD)	Lead agency in developing the Western Australian Strategy for Large Feral Herbivores. Provides strategic leadership in biosecurity matters across WA, and administers the BAM Act and the declaration process. Leads the response to incursions and eradication of priority invasive species within the state, where it is feasible and cost-effective to do so. Provide inspection and certification services for interstate border and post-border movements, and at international borders (in collaboration with the Federal Government). Coordinates surveillance and reporting from industry and community, including biosecurity groups. Responsible for policies and systems that relate to specific pests. Undertakes research into the distribution, identification, surveillance, management and control of invasive species. Raise awareness, actively engage stakeholders and empower them to share responsibility.
Biosecurity Council of Western Australia	Provides strategic advice to the Minister for Agriculture and Food, the Director General of DPIRD and other ministers on matters related to biosecurity. Comprises members with an interest and expertise in managing the biosecurity of WA. Actively engage with industry, community and Government to ensure informed and robust advice is given.

Biosecurity Senior Officer's Group	<p>Comprised primarily of senior executives from each of the WA State Government agencies with biosecurity responsibilities for biosecurity management.</p> <p>Provides strategic overview and interagency coordination of biosecurity issues of interest to the state and the activities of member agencies.</p> <p>Raises awareness and provides advice on biosecurity issues to the Minister for Agriculture and Food and other ministers as required.</p>
Local Government	<p>Raise awareness and undertake surveillance activities within the community.</p> <p>Biosecurity responsibilities as land managers.</p>
Industry	
Industry and land managers	<p>Undertake targeted surveys and passive surveillance.</p> <p>Relevant primary producers contribute to management of priority pests through Industry Funding Schemes.</p>
Community	
Recognised Biosecurity Groups	<p>Established under the BAM Act for purposes including controlling declared pests that are important in local and regional areas relevant to the group.</p> <p>Collection of the DPR, development of operational plans</p> <p>Collaborate with landholders and Government agencies to develop and implement strategic, landscape-wide management programs for invasive species.</p>
Landholders, managers and occupiers of land and freshwater bodies	<p>Primary responsibility for controlling invasive species on the lands they manage (legally obligated to control declared species).</p>
Not-for-profit and community organisations	<p>Deliver on-ground programs, fundraising, communications and awareness-raising activities.</p> <p>Be aware and informed of invasive species and the importance of surveillance, and maintain vigilance.</p>

LPMT	Licensed Pest Management Technicians
MoU	Memorandum of Understanding
RBA	Regional Biosecurity Association
R4R	Royalties for Regions
SAT	Satellite Phone
SUG	Shire of Upper Gascoyne
UV	Unimproved Value

1. Purpose of this Agreement

The Carnarvon Rangelands Biosecurity Association Inc. and the Shire of Upper Gascoyne have entered into this Memorandum of Understanding to delineate the roles and responsibilities of each organisation when relating to Biosecurity issues in the Shire of Upper Gascoyne which falls within the Carnarvon Rangelands Biosecurity Association Inc. region of operation.

2. Biosecurity Includes:

- Feral Animals – Wild Cat's, Fox's, Dog's, Pigs etc.
- Large Feral Herbivores – Wild Donkey's, Camels, Horses etc.
- Invasive Plant Species – Mesquite, Parkinsonia etc.

3. Term

The agreement commences on the 1st of April 2019, there is no termination date; however, the agreement will be reviewed from time to time and it may be terminated by mutual agreement.

4. Funding

The Carnarvon Rangelands Biosecurity Association Inc. will provide the Shire of Upper Gascoyne with an agreed funding of the Declared Pest Rates for the pastoral properties serviced by SUG employed LPMT's situated within the boundaries of the Shire of Upper Gascoyne and the matching dollar for dollar contribution from the State Government.

The Shire of Upper Gascoyne will provide funding to supplement funding from the Carnarvon Rangelands Biosecurity Association Inc. at a level determined by the Council from budget to budget.

The formulae for determining the funding is:

UV value of individual stations serviced (listed in Point 5 of this MOU) by SUG multiplied by the declared pest rate collected less CRBA Overhead Administration charge of 10% plus (+) the State Government (DPIRD) matching dollar for dollar contribution of the actual declared pest rate levied.

VEN Value of SUG listed properties x Declared Pest Rate Collected from pastoralists – 10% CRBA Administration fee.

+

DPIRD \$ for \$ Rate Invoiced.

Note: Not all pastoral properties pay their declared pest rate and final payment amounts received for the year can't be confirmed until second payment from DPIRD has been received.

The Shire of Upper Gascoyne shall have access to additional funding where relevant, through grant applications submitted by the CRBA for specific projects or other grants that may become available, such as but not limited to;

- Pest Drought 'LPMT Training & Pig Project' – ending June 2019

5. Area of Responsibility

5.1 Pastoral Properties Serviced by SUG

Meaning: In conjunction with the CRBA the Shire of Upper Gascoyne shall manage the following nominated pastoral properties within its Local Government boundary;

- Bidgemia Station (Weedarrah Station)
- Carey Downs Station (Callytharra Springs)
- Winderie Station
- Mount Augustus Station (Bingegaroo)
- Dooley Downs Station
- Wanna Station (Gifford Creek)
- Dairy Creek Station
- Minnie Creek Station (Mount Sandiman Station)
- Glenburgh Station
- Landor Station
- Dalgety Downs (Erong Springs)
- Edmund Station
- Errabiddy
- Eudamullah
- Jimba Jimba
- Mangaroon
- Mooloo Downs
- Mount Philip
- Pingandy
- Towrana
- Yinnetharra

- Lyons River

5.2 Pastoral Properties Currently Serviced by Others

Meaning: SUG Local Government boundary pastoral properties currently not included in payment calculation are listed below;

- Mount Clere
- Williambury (As a section of Williambury property with-in the SUG shall be serviced by CRBA)

The SUG shall service all pastoral properties within the boundaries of the Shire, with LPMT's contracted by the SUG, with the exception of;

- Mount Clere Station which the entire pastoral property is located with-in the SUG and is currently serviced by the Meekatharra RBA
- Williambury Station which a small section of the pastoral property is located with-in the SUG and is currently serviced by a CRBA contracted LPMT.

All rates collected by the CRBA are already provided to MRBA under a separate MOU.

5.3 Other Lands

Meaning currently accessible land located with-in the SUG such as but not limited to the Below;

- Kennedy Range National Park
- Pimbee Station Conservation Area
- Wanna Station Proposed Conservation Reserve etc.

As-well as currently un-accessible land located with-in the SUG such as but not limited to the below;

- Burringurrah Aboriginal Reserve
- Cobra Reserve
- Mount Augustus Reserve
- Mount Egerton Reserve
- Mount James Reserve
- Mount Phillips Reserve
- Waldburg Range etc.

These lands have no collected DPR paid to the SUG, The above accessible areas shall be serviced by others e.g. DPIRD or CRBA not the SUG. Unless a mutual financial agreement and scope has been put into place that would be subject to a further addendum to this MOU.

5.4 Change of Pastoral Properties Service Providers

Unless a mutual financial agreement and scope has been put into place that would be subject to a further addendum to this MOU, as agreed to by both parties. CBRA and SUG shall not enter into and start performing biosecurity services on any other Pastoral Properties as listed under sections 5.1 and 5.2 of this MOU.

6. Roles / Responsibilities

6.1 The Shire of Upper Gascoyne shall:

- Engage Licensed Pest Management Technicians (LPMT) to preform Biosecurity Control under a Shire Of Upper Gascoyne Contract;
- Engage an Officer to Manage the LPMT's and attend to all associated correspondence and regulatory requirements where practical;

- Ensure LPMT's have the necessary qualifications to perform the tasks required;
- Manage, store and distribute poisons according to the legislative requirements;
- Organise any aerial baiting programs, inclusive of sourcing bait, poison, fuel and aircraft;
- Liaise with all stakeholders (Pastoralists and DBCA Representatives) where practical;
- Process all RCP Permits and keep a register to ensure that they are being renewed as required, a copy to be provided to CRBA for group records;
- Provide the CRBA with property and monthly activity reports for LMPT's on the CRBA provided or approved forms;
- Ensure LMPT's are using the approved government wild animal recording application, Feral Scan Device;
- Ensure SPOT and Feral Scan are used on a daily basis while operating as an LMPT.
- Send a representative to all CRBA Meetings where practical;
- Conduct regular management and Council level Biosecurity Meetings where the CRBA will have an opportunity to attend and or have access to attend or minutes of such where practical;
- Provide the CRBA with a monthly copy of our income and expenses for the Shires Biosecurity Program;
- Make additional one off payments / contribution for specific projects if the Shires budget can accommodate and Council agrees;
- Ensure that both SUG contracted LPMT's attend CRBA training days where practical;
- SUG to supply a copy of relevant qualifications, licences, permits, insurances, registration for any LMPT contracted by SUG;
- Work collaboratively with the CRBA.

6.2 The Carnarvon Rangelands Biosecurity Association Inc. Shall:

- Pay an agreed amount based on the funding formulae noted in section 4 of this MOU.
- The timing of the payment to be within 10 days of the CRBA receiving funds from the Declared Pest and Animal funds collected and held by DPIRD. The CRBA will advise the Shire of Upper Gascoyne once the payment has been received. The Shire of Upper Gascoyne will then issue an invoice for payment. The CRBA will advise amount using actual funds received and formula relating SUG.
- Keep the Shire of Upper Gascoyne informed of all Biosecurity issues / activities;
- Provide copies of Agendas and minutes of all CRBA Meetings;
- CRBA take full liability for CRBA LMPT's working within the SUG Boundaries;
- CRBA LMPT's to be supplied with appropriate equipment required to work within the SUG (Spot Devices, Feral Scan, SAT Phone, etc.);
- CRBA to supply a copy of relevant qualifications, licences, permits, insurances, registration for any LMPT engaged by the CRBA that works within the SUG;
- Work collaboratively with the Shire of Upper Gascoyne; and
- Ensure that Shire of Upper Gascoyne Employees have access to CRBA initiated training where additional funding has been acquired via grant applications.
- Ensure that the CRBA incorporate SUG in support such as but not limited to supply of Available - Administrational assistance, Grant Applications, Acquired Grants, Additional Funding, Feral scan devices, Traps, Bait supply and signage to perform Biosecurity works to Pastoral Properties and Other lands within the SUG.

7. Issues of Concern (That may impact on this MOU)

At the time of entering into the MOU the land, formerly pastoral leases, previously under the control of the DBCA have been handed back to the traditional owners. Previously the DBCA had a MOU with the CRBA to undertake Biosecurity works (primarily Wild Dog Control) on these properties. The Shire are seeking clarification as to whether these properties are rateable under the Local Government Act and the Biosecurity and Agriculture Management Act 2007. Dependent on the answers the level of service required could increase significantly, these would be subject to a further addendum to this MOU.

Executed MOU

Signed by the Chairperson the Carnarvon
Rangelands Biosecurity Association Inc.

Signed by the CEO of the Shire of Upper
Gascoyne.
